

## What is Coffee Stain Remover?

A highly potent safety bleach for removing coffee and other 'impossible' stains from carpet, fabric and hard floor surfaces.

### Key Benefits

- ✓ Gets out those "impossible" stains like coffee, tea and food dyes.
- ✓ This product degrades naturally and leaves no residues in the fabric.
- ✓ A safety bleach which will not attack most water-resistant fabric dyes.
- ✓ A convenient liquid product – no powders to dissolve. Just mix parts A and B together in equal proportions.

### How Does It Work?

COFFEE STAIN REMOVER is a highly potent peroxide safety bleach for removing coffee and other "impossible" stains from carpet and fabric upholstery. Instant coffee often contains food dyes which leave golden brown stains on fabrics. As they result from brown dyes, such stains can be very persistent and do not respond to normal spotters. In such cases, COFFEE STAIN REMOVER should be used to actually attack the brown dye and make it disappear. It is also useful on tea, red wine and food-dye stains. For stains caused by pure, brewed coffee, we recommend that TANNEX be used.

### For Use On...

This product can be used on washable fabrics, carpets, wood and stone floors. Pre-test on marble and limestone surfaces before use.

### Caution

COFFEE STAIN REMOVER is very reactive. Never mix with other chemicals. Keep mixture away from metal surfaces.

## Technical Data

### Properties

COLOUR – Both parts are clear liquids  
ODOUR – Faint ammonia odour  
pH Part A = 11.5  
pH Part B = 3.0  
pH Mixture = 9.5

### Environmental Care

COFFEE STAIN REMOVER conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. COFFEE STAIN REMOVER is non-flammable, contains biodegradable surfactants and is chlorine-free and phosphate-free. COFFEE STAIN REMOVER containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

### Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

### Application

- COFFEE STAIN REMOVER is prepared by blending two liquids together. This mixture will give off bubbles of oxygen, so it should not be stored in a closed bottle, jar or spraygun. It should be mixed in an open plastic or glass jar or cup. Do not use metal spoons or containers.
- Mix 100ml of PART A with 100ml of PART B.
- Test for colourfastness on an out-of-the-way area of the carpet or upholstery. Make certain that no colour dyes on the fabric are affected.
- Sponge the solution onto the stain and work into the pile with a rag, plastic scraper or pile rake. Do not overwet the carpet or fabric.
- Leave to activate for 20 minutes or until the stain has disappeared.
- Rinse the solution away with clean water and extract the area to speed up drying.

### Disposal Information

#### 1. Used solutions -

Used Solutions of COFFEE STAIN REMOVER should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

## 2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

## 3. Empty packaging

### Bottles and drums

Our 500ml and 5L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. COFFEE STAIN REMOVER containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

### Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 500ml

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
