

What is G-Solve?

G-SOLVE is a pre-spotter for removing stains from carpet and clothing prior to rinsing or washing. It is a solvent-based product for removing oily and greasy-type stains and can be washed out with water or detergent.

Key Benefits

- ✓ A potent solvent for carpet spotting and removing difficult soilage
- ✓ Dissolves grease, chewing gum, tar and adhesives and oily stains
- ✓ Non-Dangerous Goods

How Does It Work?

G-SOLVE is a sophisticated blend of solvents and surfactant. It will remove: adhesives, grease, chewing gum, oil, asphalt, tar, wax, rubber marks, some inks, metal polish, tobacco, oil-based furniture polish, silicone, Blutak®.

For Use On...

G-SOLVE may be used to pre-spot carpet and clothing and to clean hard surfaces.

NOTE: G-SOLVE may attack some rubber and soft plastic surfaces. Always test before use.

CAUTION

Do NOT use G-SOLVE on tar-backed carpet tiles because it will dissolve the backing and produce tar stains on the face of the tiles.

Technical Data

Properties

COLOUR – Clear colourless liquid
ODOUR – Faint pine/citrus
SOLUBILITY IN WATER – Dispersible
pH = N/A
EFFECT ON METAL – Nil
SPECIFIC GRAVITY – 0.8 - 0.9

STORAGE SHELF LIFE – Indefinite in sealed container

FLAMMABILITY – G-SOLVE is not flammable, but is combustible

Environmental Care

G-SOLVE conforms with all statutory environmental requirements. G-SOLVE contains no phosphates or chlorinated hydrocarbons. G-SOLVE is an industrial solvent and should be treated with due care and applied sparingly. G-SOLVE containers will be cleaned and reused if returned to Agar Cleaning Systems, significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

Carpet Spotting: Pre-test to ensure no colours run.

Apply G-SOLVE to a nappy or pale-coloured cloth, dab the stain working inwards from the edge to the centre. G-SOLVE works best on dry carpets. Blot the stain clean with a clean cloth or towel and flush with clean water to remove any residue. Alternatively, extract the stain residue with extraction detergent (EXIT or CITRUS EXTRA) after pre-spotting with G-SOLVE.

Removing Adhesives or Chewing Gum:

Scrape away excess. Pour G-SOLVE onto residue and leave to penetrate and break down. Work in with scraper. Use scraper to punch holes in lumps of gum to assist G-SOLVE to get under it and release it from the surface. Lift off the gum then remove any residue with more G-SOLVE and give a final rinse with water.

Felt-Pen Graffiti:

Test G-SOLVE on surface in an inconspicuous area to ensure compatibility. Spray G-SOLVE onto graffiti and wipe-off immediately.

Clothing:

Spray collars, cuffs and stains with G-SOLVE then launder.

Industrial Cleaning:

G-SOLVE is an excellent solvent cleaner for removing oil, grease, tar and other oil-soluble stains from metals, paintwork and many hard surfaces.

CAUTION

G-SOLVE may make floors slippery until it has been rinsed off.

NOTE: G-SOLVE should always be rinsed out because it contains detergent ingredients that will leave a residue if not washed away.

Storage

G-SOLVE is stable for 12 months. Store in the original sealed container and keep out of direct sunlight. Also avoid storing the product in extremes of temperature; try to keep it between 10- and 30-degrees C.

Disposal Information

1. Used solutions -

Used Solutions of G-SOLVE should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. G-SOLVE containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 500ml, 1L, 5L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
