

What is Single Step?

SINGLE STEP is a concentrated, food-grade cleaning and sanitising detergent for use in all kitchen and food-processing areas. It is designed to remove food residues from all hard surfaces, whilst killing germs at the same time.

Key Benefits

- ✓ Cleans and sanitises in one step
- ✓ Effective on a wide range of bacteria
- ✓ Low alkaline and safe on aluminium
- ✓ No rinse required when diluted to 1:90

How Does It Work?

SINGLE STEP is a concentrated food-grade cleaner and sanitiser for use in kitchen and food processing areas. When washed with SINGLE STEP, items are rendered clean and free from most common bacteria.

For Use On...

SINGLE STEP is an excellent cleaner and degreaser for general surface cleaning, sink washing of pots and pans, floor cleaning and for cleaning equipment such as filling machines, cookers, tables, cutting implements, conveyor belts and mixing pans.

Technical Data

Composition

SINGLE STEP is a liquid cationic detergent sanitiser with ingredients to lift and emulsify fats and oils (non-ionic surfactants), soften water and kill germs (quatary ammonium compound). SINGLE STEP is effective at destroying a wide range of gram-positive and gram-negative bacteria as well as moulds and fungi. It is a low-toxicity product and is stable to light and heat.

Properties

COLOUR – Colourless
ODOUR – Odourless
pH = 7.5 – 8.5
FOAM – Moderate foam

Environmental Care

SINGLE STEP conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. SINGLE STEP is non-flammable and based on biodegradable surfactants. SINGLE STEP containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd., significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Approvals

SINGLE STEP meets the requirements for use under Category 7 as a Sanitiser/Detergent for use in all departments of establishments registered under the Export Control Act 1982 by the Australian Quarantine and Inspection Service for preparation of meat and meat products for export.

Application

Do not mix SINGLE STEP with any other chemicals.

No-Rinse Cleaning and Sanitising:

- Dilute SINGLE STEP to 1 in 90. Apply the solution to the surface with mop, cloth or sponge or pump through pipes. Leave the solution in contact with surface for 5 minutes or more. Rinsing is not required, but treated surfaces should be adequately drained before processing operations resume. Direct contact with prescribed goods (e.g. Foodstuffs) must be prevented.

Floor Cleaning:

- Heavy Soilage – Use diluted to 1 in 10 parts with water.
- Medium Soilage – Use diluted to 1 in 20.
- Mop floor with solution, leave to soak 5 minutes, scrub, mop up then rinse with clean water. Squeegee floors to speed up drying.

General Cleaning, Walls, Equipment, Stainless Steel Benches:

- Use diluted to 1 in 40. Apply with mop, cloth or sponge. Scrub then rinse thoroughly with clean water.

Sink Washing:

- Presoak heavily soiled items. Dilute to 1 in 40, wash items then rinse with clean water and dry in racks.

Foam Gun Application:

- Cover all food or remove from area before cleaning. Assemble foam gun and add neat SINGLE STEP to bottle. Spray hot foam onto all surfaces. Allow to react for 5 minutes. Rinse all residues away with clean, cold water from hose.

Recirculation (CIP):

- Dilute to 1 in 70 with water at 40°C to 80°C. Recirculate for 5 to 30 minutes depending on degree of soilage.

Product Data Sheet

Product Code: SIN

Issued: October 23, 2025

Disposal Information

1. Used solutions -

Used Solutions of SINGLE STEP should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. SINGLE STEP containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L, 20L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
