Polivibe OSCILLATING SANDER

OVERVIEW

Introducing the New Generation Polivibe Oscillating Sander.

Powered by the latest oscillating technology and design innovations, the new generation Polivibe is packed with features to help you get the job done faster.

New design changes see the handle anchor points moving from the rear of the machine to its centre. This moves the centre of gravity closer to the middle of the machine allowing for a better distribution of weight across the sanding surface.

All Australian designed and built.

SPECIFICATIONS

MOTOR	1.1 KW (1.48 HP), 50 hz, 230-240 volt
DRIVE PAD SIZE	50CM x 35CM
OSCILLATING SPEED	2850 RPM
WEIGHT	72KG
