

What is Autodish?

AUTODISH is an excellent cleaner for glassware, crockery and cutlery in automatic dishwashing machines.

Key Benefits

- ✓ Leaves dishes spotlessly clean
- ✓ Controls staining
- ✓ Sanitises dishes
- ✓ Low foaming
- ✓ Prevents scale build-up

How Does It Work?

AUTODISH is an industrial strength dishwash detergent, designed to be dispensed into large institutional dishwashing machines through the Detergent Dispenser Unit. This unit constantly meters the wash water and always maintains the correct detergent concentration.

For Use On...

AUTODISH is a high-performance detergent that provides excellent cleaning of dishes, glasses and cutlery. AUTODISH controls staining and leaves dishes spotlessly clean. The chlorine in AUTODISH ensures that dishes are also sanitised as they are washed.

Technical Data

Composition

AUTODISH contains caustic alkali (in the form of potassium hydroxide) for fast removal of foodstuffs and soilage; available chlorine for removing stains and to oxidise and break down food residues; phosphate builders to soften hard water and suspend dissolved minerals, preventing redeposition on glasses and tableware; defoamers to ensure fast breakdown of foam generated by protein soils in the wash solution and to enable the machine to operate at full pump pressure; sequestrants to condition hard water.

Composition

AUTODISH is a Class 8 corrosive liquid.

U.N. No: 1719	CLASS: 8
PACK GRP: II	HAZCHEM: 2R

Properties

COLOUR – Transparent colourless liquid
ODOUR – Mild chlorine odour
pH = 13.0 – 14.0
FOAM – Low foaming, acts as a foam suppressant
DISSOLUTION – Liquid product blends easily with water

Environmental Care

AUTODISH conforms with all statutory environmental requirements. It is based on safe ingredients selected to perform efficiently so there is no waste or damage. AUTODISH is non-flammable and biodegradable. AUTODISH containers will be cleaned and reused if returned to Agar Cleaning Systems, significantly reducing plastic usage and waste. They can also be recycled.

Quality

The design, manufacture and supply of all Agar chemical products is controlled by the Agar Quality Management System which is registered and externally audited by SAI Global as complying with the requirements of AS/NZS ISO 9001 "Quality Management Systems – Requirements".

First Certified: 30 April 1996 SAI Certificate No.: QEC7358

Application

AUTODISH is designed to be dispensed by our Detergent Dispenser Unit which meters the wash water at all times. Correct adjustment of the Dispenser to maintain the AUTODISH at 0.15% concentration ensures trouble-free operation and excellent results with dishes coming out spotless, sanitised and sparkling.

Note: Polished or anodised coloured aluminium-ware, lead crystal and hand painted china may be affected by machine dishwashing – please follow manufacturer's directions for washing these items.

Disposal Information

1. Used solutions -

Used Solutions of AUTODISH should be poured into a drain or trough that leads to the sewer system or a septic tank. These systems have a method for treating and breaking down the waste. Used solutions of detergent should not be poured into stormwater drains or down driveways as these drains are designed for rainwater and ultimately lead to the local river system.

2. Unused product

It is best to keep the product and use it up! If this is not possible, try to give it to someone who can use it. (Make sure the product is in its original, labelled container).

If there is no alternative but disposal, it is safe to pour modest quantities of this product down the drain (to sewer) with running water. Leave the cold tap running for a few moments afterwards as this dilutes the product and reduces the concentration in the wastewater.

Remember, do not mix different cleaning products together during disposal!

3. Empty packaging

Bottles and drums

Our 5L and 20L bottles and drums are made from HDPE (polyethylene) or PET which can be recycled. You can dispose of these containers via the kerbside collection program or other recycling system. AUTODISH containers will be cleaned and reused if returned to Agar Cleaning Systems Pty Ltd, significantly reducing plastic usage and waste.

Cardboard cartons

Used boxes should be flattened and recycled in OCC (old, corrugated cardboard) or mixed wastepaper recycling programs.

Available in: 5L, 10L, 20L

Agar Cleaning Systems maintains Safety Data Sheets (SDS) on all its products. These sheets contain information that you may need to protect your employees and customers against health or safety hazards associated with our product. Agar Cleaning Systems recommends that you obtain a copy of the respective SDS sheet prior to using this product. The information in the Product Data Sheet is based on data we believe to be reliable. It is offered in good faith, but without guarantee, as conditions and methods of use of our product are beyond our control.
