TerraCyclic™  
BioBin

The Environmentally  
Friendly Disposal Unit

# The Only Environmentally Friendly Sanitary Waste Disposal System

- Biodegradable plastic additives
- Natural deodorisers and bacterial growth inhibitors
- Eliminates the need for cleaning chemicals
- Conserves water
- 2 out of 3-star seal of approval from Carbon Footprint Ltd
- Protects our oceans, lakes, rivers, and sewage systems
- Non toxic to sensitive plants and animals

## Unique Cartridge Disposal System

TerraCyclic's sleek cylindrical unit is compact and unobtrusive; the unit holds the replaceable cartridge.

TerraCyclic™ cartridges are made using biodegradable plastic additives, which are completely safe to return to the earth through normal refuse disposal.

The cartridges are charged with biodegradable liquid gel, which release a protective vapour throughout the unit safeguarding all users against harmful bacteria associated with pathogenic waste.

The unique dome shaped lid gives users the option to dispose of dressings without touching the outer areas.

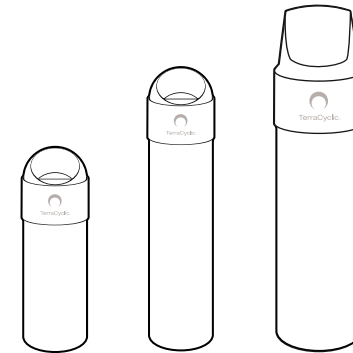

Cartridges are easy to store, replace and dispose of, with no cleaning involved.

### Instructions

Simply insert the new cartridge into the cylinder and when replacement is required dispose of the cartridge in its entirety with normal refuse.

## Fits in even the smallest spaces

**SMALL**  
6.5 litre  
50cm tall  
16cm ø

**REGULAR**
