FOR OUR LITTLE MESS MAKERS

FEATURES

1. Easy to use, easy to maintain with a cleaning time of 90mins.
2. Scrubber easy to reach lower narrow regions, great for compact areas.
3. Low noise levels, even in noise-sensitive places can be cleaned during the day
4. One of its main features is easy to carry, it can be directly folded on the trunk of a car.
5. Ergonomic handheld scrubber with a touch screen, a touch and easy to operate.
6. Easy tool replacement brushes and the squeegee blade.
7. Roman tank made from high-quality polyethylene plastic, lightweight, corrosion resistance, high temperature, good sealing performance.
8. Leaves floor dry in under 30 seconds, great for family homes, kids, inside pets.

70% to 80% of dirt and debris that enters a home comes through the front door. Now, how long and how regularly does your child spend on that same floor? And how regularly do you clean it? With Ecomop 43" not only does it have multiple benefits including cleaning better than a regular mop it's designed to be used around homes.

- Quiet Motor
- Reduced cleaning time
- Reduced labor
- Compact design for narrow areas and easy storing.

MODE 4

MODE 3

MODE 2

MODE 1

Place brushes clockwise to attach at the bottom of scrubber

Mode 1: clean water + brush motor on (dusty or relatively dry working ground environment)

Mode 2: brush motor on (deep clean with a solution already present on the ground)

Mode 3: brush motor + vacuum motor start (Sucks up dirty water after a deep clean)

Mode 4: brush motor + clean water + vacuum motor start (under normal working ground environment)

Eco Mop 35" can work on a number of hard surfaces such as tiles, ceramic, wooden, vinyl, and laminated flooring.

With its strong suction, Eco Mop 35" leaves your floors almost dry after use which is perfect if floors need to be used immediately after.

Great for homes with kids, child care centers, medical centers, gyms, and other various commercial industries.

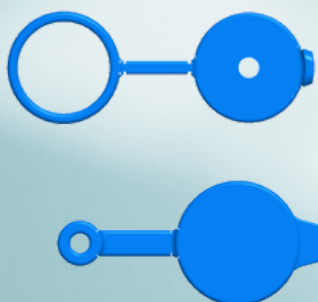

SOLUTION TANK

The solution tank is where you place clean water. You can add in your antibacterial or floor cleaning chemicals and dilute as instructed. The solution tank can hold up to 1.6L.

RECOVERY TANK

This part of the tank collects the dirty water. You can refill the solution tank twice before you would need to change out the recovery tank.

SOLUTION TANK

RECOVERY TANK

The solution tank is embedded into the recovery tank giving the scrubber a compact design.

- 1 SOLUTION TANK ASSEMBLY
