Ecomop 48 PRO is a multi-purpose cleaning machine that uses the mechanical movement of the disc brush and the chemical action of water and detergent solution to clean hard floors with various stains.

With its strong suction, it can collect the soilage and detergent solution at the same time leaving the hard surface bone-dry.

By using this floating ball design, it protects the water motors from any damages.

The machine has an easy-operating front panel. A switch for Vacuum, scrubbing, and water.

The Ecomop 48 also has a wide-area LED design light, now making dim places visibly easier to be seen without any problems.

With an easy and convenient drainage process that is fast and simple keeping your hands clean and free of any unwanted residue.
